PREFACE

Om Awignam Astu Nama Siddham

Windu Sara Murti

Anglebur Sarat Kabeh

Let us first of all extend our sincere gratitude and deep respect to God and the Universe, which the duties and obligations of life can be carried out with truth and kindness.

This calendar can be used for learning, especially learning within oneself. The relationship between the universe and the small universe within oneself is very close, even we must be able to live in harmony and balance without denying the nature of the universe.

This micro cosmos and macro cosmos calendar can be used as a guide in carrying out all activities in daily life, can be useful in the journey of intellectual life and spirituality.

The basis of *Urip 1* through *Urip 9* can be searched from the day of birth using the Balinese *pawukon* system. Besides, the description of each *Urip*, both micro cosmos and macro cosmos, is attached in the right side of the calendar.

I hope this calendar will be beneficial.

TESTIMONIAL OF CALENDAR

In my studies with I Gusti Putu Karep (The Master of Windu Sara Foundation), the study of Balinese astrology made help me to understand the micro macro relationship in the native teachings of Bali.

The calendar also allows us to deepen the aforementioned relationship daily and make it alive in us.

This thousand-year-old knowledge always practiced and studied through time gradually established in the Wariga concept which allows us an interpretation based on the experience of wise men and scholars and to have an annual calendar which accompanies us in a simple direct and factual way.

On one of my first trips to Bali, I had a motorcycle accident, I Gusti Putu Karep told me that I had arrived in Bali on a bad day. Since this event I have always chosen to travel on favourable days according to the Balinese calendar and I have never had any accidents or problems during my travels.

In the dance of the universe the Balinese calendar is a precious companion.

PHILIPPE RENUCCI

The Urip Calendar give a great help for specifics things. Everyone had already noticed that some days are easy, others are less...In some days you succeed in your meeting, your work is easy...and in others days you feel sad, sometimes angry and you don't know why...

The Urip calendar helps me if I had some meeting with people to program; I will choose a day with Macro 1 or 7.

If I don't feel well in the morning I can check it's always a Micro 5 or 6... It's just a question of time...this day will end...

I usually look after Micro (concern you with yourself) and Macro (concern you with the others) and it depends what I'm looking for.

If it's possible I can adjust my schedule regarding to Micro and Macro Urip calendar; it happens that I cannot look at the calendar so I just follow my intuition...early in the morning you should know how could be the day.

Its bases on the universe rules: the sun, the moon, the stars...

It is always a part of us so you can always have a look after the Urip calendar: or before to program well, or after to check your intuition...

It is a precious help. If you have the opportunity to do it for all your family...it will help to understand each other...to be more tolerant and in the peace.

AGNES HELEWA

I went to Bali for the first time in January 2011 with the hope of finding the key to face and overcome my existential difficulties. *I was in such a state of exhaustion and mental confusion that my health was deteriorating and I felt completely at the end of my tether.* I had a great fear: that of dying soon. My sister had just died at the age of 55 from cancer. My parents, too, had died of cancer a few years earlier. I thought that my time to leave was near and that my life would end at 56 years old. My 25 years of meditation did not help me find the way to regain control of my health, vital energy and clarity of mind. I felt in a state of infinite solitude. At that time, I saw myself as an unhappy, frustrated person who *would never manage to fulfill my dreams of self-realization* in this life.

Witnessing my deep distress, longtime French friends in Bali had the great idea of introducing me to an *inspirational* person, a wise healer named I Gusti Putu Karep. After a few interviews with him, I could feel his support, his kindness, his subtlety of spirit, and his *particular tender* ability to tell the truth without being offensive. *An example of this transparent wisdom was when he evoked this phrase in explaining my way of being in the world; "You are like a kite that moves with the will of the winds with no control over the strings which direct it's course". What he says resonated deeply with me. He hit the nail on the head.* The ego, on the other hand, took a hit, and my 25 years of Buddhist practices *was found wanting.*

During these years, I felt that many things hindered my inner journey even if I realized, in my professional life, beautiful interesting and rewarding projects. I had begun to simplify my life so that it would be more peaceful, but I felt that my inner life was not moving forward. My negative emotions, my ruminations or internal struggles were always present. I felt stuck in my difficult patterns without knowing how to transform them.

After a few interviews, I Gusti Putu Karep volunteered to be my father to guide and take care of me if I agreed. I was so moved that I murmured and mumbled a few thanks in Balinese "Matur Suksma". *It upset me that I couldn't find the words to express my deep gratitude to him more clearly.* The proposal to be my father was, for him, a way to establish a genuine relationship without distance. He felt able to give me what I needed without ulterior motives.

And, thus, over the years, I received the authentic and ancestral teachings of Bali based on the bodily inscription of the macrocosm that is to say of the link between the universe and the human body. All life on earth is punctuated by the alternation of day and

night, and of the seasons. Without the sun, there is no photosynthesis for plants, and no oxygen for animals and humans. What we call life, or health, or the biosphere are complicated systems of interconnections that have no beginning or end.

I thus incorporated the practices into my Parisian life that made me grow and mature. I was also introduced to Balinese astrology, a very important science in the culture of Bali. Astrology is not just an intellectual knowledge, but a living knowledge. It integrates with all major events of daily and spiritual life. Among these astrological calendars, there is one, the URIP calendar which indicates to the person, every day, his personal link with the macrocosm (universe) and the microcosm (the body). For years, I have observed and followed the indications of this calendar by feeling the influence of the macrocosm on my body and mind. It allowed me to become more aware of my interconnectedness, although intuitively from my childhood, I knew that we humans were all connected to each other and interconnected with the forces of the universe.

This tradition, in a way, allowed me to give back to nature what she gave me and to move to a more harmonious intimacy with the whole life. This way of "seeing" and "being" explores the natural elements of the body in relation to nature: earth, water, air and fire. It is about feeling the experience of one's own body to find what it has in common with nature and the universe. I became aware of my place in the family of the universe.

Today, I always call him Adji, which means "father". He gave my life a depth and dimension to which I could not have accessed without his support, his attention, his infinite compassion and without the rich, luminous and ever-alive knowledge of the Balinese tradition.

Om Awignamastu Nama Siddham,

THE COLOURS OF THE DAY

Many people do not understand about blessing, they often complain about having done a lot of praying, gone to a sacred place and got nothing. Praying must be done on a right time to attract miracles and blessings. To ensure that, you must be sensitive to the sense and miracle. The purpose of all this is to make us become more sensitive, specifically become more sensitive to the miracles and vibrations that exist in the universe, regardless of what other people say.

Miracles is what we are looking for the most in our life. Miracles moves dynamically. Every single thing in this world has miracles, including the 13 elements of the universe, namely: (1) *Pertiwi*, (2) *Apah*, (3) *Teja*, (4) *Bayu*, (5) *Akasa*, (6) *Surya*, (7) *Candra*, (8) *Lintang*, (9) *Tranggana*, (10) *Gni*, (11) *Banyu*, (12) *Angin*, and (13) *Ambun*. All of them have miracles. As with the *Pertiwi* (earth), everything that is real has miracles. There are miracles between the reality and God. Here is the explanation of each miracle in the universe.

1. *Pertiwi* (earth). Earth has a miracle in a form of gravitation. In micro cosmos, this miracle can be used to attract the other person. Earth Miracle is also in the form of patience;
2. *Apah* (dew). The miracle from *Apah* provides coolness at night. In micro cosmos, this miracle is in the form of serenity, which we can share to others. We can provide serenity to others if we can access the *Apah* miracle. This miracle can also be used to heal others.
3. *Teja* (sunlight). The sunlight miracle in reality is in a form of Vitamin D. It is comprised of Vitamin D1, D2, and even Vitamin D3 at noon. Until 1 o'clock in the afternoon, those Vitamins were reduced and gone. *Teja* is the cause of the emergence of colour. Like flowers that are coloured because they absorb *Teja*. Therefore, flowers can be used for prayer because there are output and input. First, there is input in the flower from sunlight, then we can use it back to the universe. *Teja* is a seed of knowledge. We also call miracles from sunlight as *Sanghyang Tiga Sakti* or *Gayatri*, because there are three main benefit of sunlight based on its time. The morning sunlight is beneficial for increasing our knowledge, at noon or daytime is dominant for our patience, and the sunlight in the afternoon makes composure.
4. *Bayu* (Power). *Bayu* is predominantly in a form of the powers from heat and water that make the winds. This miracle causes a change in season. In the micro world, the power from water and heat, is in the form of charisma. The power of the wind moves things to make them spread evenly. Therefore, in macro cosmos, there is a shift in rain, because rain is very important to water all plants on earth. And by the power from the wind, moves the rainfall and makes it spread evenly. If we access this miracle, we can transfer this power for others. It can be used to heal other from sickness. Besides, the power from the wind can make someone famous.

5. *Akasa* (atmosphere). *Akasa* is actually a change from the earth's substance into an ozone layer. So, ozone has a very strong power to hold the earth. Ozone also makes a balance of power with the moon. Then the earth and moon must be balanced. If the earth and moon are out of balance, there will be a rotation error and shift in the galaxy. In micro cosmos, this miracle is beneficial for holding the power of one self (ego). We must be able to hold power over ourselves. If someone already knows about something negative, but can't hold his/her ego, this can be dangerous.
6. *Surya* (Sun). The special miracle from the sun are (1) keep the seed of knowledge, (2) to make someone to possess clairvoyance, the supposed faculty of perceiving things or events in the future or beyond normal sensory contact.
7. *Candra* (moon). The main function of the moon miracle is to make peace and makes someone more sensitive to premonitions. If someone respects the moon, he will know beyond the reality (metaphysics). He will also be able to sense the premonitions beyond the reality.
8. *Lintang* (star). In micro cosmos, stars are the seed of actions. The proof is that, many people who are sleeping are not controlled by his mind, but sometimes his hands move. Movement or a certain vibration is caused by the stars. The miracles of stars move these vibrations, for example the vibrations we receive or feel within our body movements.
9. *Tranggana* (electron). Electrons and protons are related each other, protons are on Earth and electrons are in the sky. The connection between them is the origin of the creation, or so-called ideas. In micro cosmos, people can have ideas due to protons and electrons. Their connection makes a new idea.
10. *Gni* (fire). The Goddess of fire is *Brahma*. It is very important to understand the miracle of fire. It is beneficial for the healthiness and also for the creation. Electron and proton are the ingredients of the ideas for creation, but the center of the ideas is the fire. This is the central and resource of the creation.
11. *Banyu* (water). The Goddess of water in Bali is *Wisnu*. The human body consists of 80% water. Water keeps all of the miracles. Water in the could keep all miracles from the sun and also holds its power.
12. *Angin* (wind). The wind miracle is in a form of equality or justice. In macro cosmos the function is to ensure the movement of the cloud and rain. In micro cosmos, it is for the movement of education. For example, as a teacher, we know which students have less miracles, and which students have good miracles. If the students have good miracles, they might be able to receive 80% of the knowledge being taught. The absence of this miracle will decrease our charisma and reduce the function of equality and justice.
13. *Ambun* (cloud). Cloud distributes nutrients to all plants. Foods for all plants are possessed by the most perfect clouds. In micro cosmos, this miracle can be used to 'water' the other person when she/he is having a chaotic mind or many problems. It is like pouring water / sprinkling water to other people. It calms the psychology and nurtures oneself. Someone who do not have this miracle, do not have concern for

others. If we master or are sensitive and truly believe, cloud will bring nutrition to ourselves and others within the universe.

We need to get the miracle of all those 13 elements of the universe. Therefore, we must learn astrology, or in Bali we call it as *wariga*. *Wariga* gives us guidance, to get the miracles. So, we will know the right time to pray, meet biological needs, meet psychological needs, as well as material needs, or a right time to do spiritual things.

		<p><i>Purnama</i> (full moon). The main function of full moon in the macro cosmos is to balance the earth and moon. It is the guardian of the rotation of galaxy. At full moon, we may utilize the moonlight to express our feeling to the ancestors and God, because the energy will ride on energy also. Therefore, offering prayers is the best activity to be done during the full moon.</p> <p>A diet that good to be done during the full moon is eating <i>sarwa wija</i> (seeds), such as beans, corn, rice, etc.</p> <p><i>Purnama</i> is also called <i>Segara Putih</i>, because it can broaden the insights of both <i>Aparawidya</i> and <i>Parawidya</i> knowledge.</p>
		<p><i>Tilem</i> (black moon). During black moon, we can attract and absorb the miracles balance and peace, as well as the blessing from the universe, Ancestor blessing, and God blessing.</p> <p>A good diet is vegetables and fruits, because leaves is best for attracting sunlight. The leaves are where photosynthesis taken place, so that they are beneficial for attracting the nutrients of nature.</p>
<p>12</p>		<p>The light blue number sign is called <i>Kajeng Pon</i>, coming every 15 days, to worship the ancestors, where we will automatically get blessings and talents from the ancestors.</p> <p>We can provide the offerings in the form of egg omelette and rice, tea and water for the drinks. We can consume the rest of these offerings.</p>
<p>Oton</p>		<p><i>Oton</i> or birthday in Balinese astrology occurs every 210 days. In 1 year of the lunar calendar there can be 2 or 1-time <i>Otonan</i>. The diet is eating 'white' for 3 days. White diet is eating only white rice, salt, and oil. It is done 1 day before birthday, on the day of birthday and 1 day after birthday.</p> <p>During the day of <i>Otonan</i> we can do meditation. Meditate on <i>Otonan</i> day is attracting the souls of the ancestor. We consider the soul of ancestor to be at the front of the nose. We pull the soul of the ancestor, then we bring it to the middle of the brain. In the midst of our brains we must visualize the soul, then we thank our ancestors, and we are really faithful, loyal and devoted to our ancestors. After we communicate and visualize our ancestors' soul, we carry it to the cerebellum, between the cerebrum and the</p>

		<p>cerebellum there is holy water, which can cleanse the soul of the ancestors. It is possible that we our ancestor soul is still full of anxious nature, or bad karma, so that we can purify them through meditation. After the cleansing, we may release it to the heavens, we leave it to the immortal worlds. Everything can change through a meditation like that.</p> <p>Mantra: <i>Ang, Ang, Ang, Swatyem</i>, (9 time). We also do, slow and soft respiration.</p>
Sunday	White Cloth	<p>This means that Sunday contains of sunlight, predominantly white. We should wear white cloth on Sunday to harmonize with nature. Wearing white clothes has something to do with <i>segara putih</i>. The <i>segara putih</i> in the universe is the point or essence of knowledge, so that, everything turns white. This means that various kinds of knowledge and core knowledge can be stored in us.</p>
Monday	Black Cloth	<p>Monday was vibrated by <i>Candra</i> / Moon. Its main function is to make peace. The second function is settling down mind. We can truly respect the universe, not acknowledge ourselves only. There is also a vibration about innocence. It is also related to <i>segara ulung</i> or <i>damuh</i> / dew. Dew goes down to bring premonitions. Although it is not directly touched, because of the roof of the house, but the miracles of <i>damuh</i> would still reach the worshipers. Things that are related to black are moon, <i>segara ulung</i>, and the dark colour of the night.</p> <p>We should wear black cloth on Monday to harmonize with nature.</p>
Tuesday	Orange or Purple Cloth	<p>Tuesday is related to the colour of orange which on ultraviolet can destroy the virus. Including viruses in the world of science. In the micro cosmos, it can destroy the negativity of others. Spiritual people with this miracle could destroy the intentions of other people through eye contact or with a smile. Tuesday is also related to <i>segara muncar</i> to make evaporation. The greater our energy, the greater our ultraviolet is. In doing pranayama yoga, it will produce more <i>Tirtha</i> (holy water). Because of the evaporation, a lot of dew becomes holy water.</p> <p>We should wear orange or purple cloth on Tuesday to harmonize with nature.</p>
Wednesday	Yellow or Green Cloth	<p>Tuesday and Wednesday it has something to do with <i>segara ijo</i>. Wednesday is related to flowers and leaves. The function of the <i>segara ijo</i> is that we can make use of ourselves in all situations and conditions. Wherever we are, we can adapt and adjust. It is like the function of the green leaves, and flowers. Flowers and leaves are always related. The function of the leaves is to process nutrients from the earth, also from nature, assisted by sunlight. And the leaves automatically produce flowers and fruit, including strengthening tree trunks.</p>

		<p>The Goddess of Wednesday is <i>Mahadewa</i> and <i>Wisnu</i>. <i>Wisnu</i> possess all of the miracles that exist in this universe. While <i>Mahadewa</i> build the mental strength and morality, such as moral responsibility, moral independence, and moral courage. This is the power function of <i>Mahadewa and Wisnu</i>, which was influential on Wednesday. If there are no blessings and miracles from <i>Mahadewa and Wisnu</i>, one cannot be in the process of strengthening mental and moral development.</p> <p>We should wear yellow or green cloth on Wednesday to harmonize with nature.</p>
Thursday	Pink Cloth	<p>On Thursday it is influenced by the <i>segara angawang-awang</i>. <i>Segara angawang-awang</i> is also called a cloud. It also functions the same way as clouds that can distribute nutrients to plants. It is like someone who provides the essence of knowledge to others. Thursday it is also related to <i>Bhatara Guru</i>, which means it can store knowledge. If we cannot store knowledge, we cannot become a teacher. When we get the core of knowledge, we can share the knowledge with others.</p> <p>We should wear pink cloth on Thursday to harmonize with nature.</p>
Friday	Blue Cloth	<p>Friday is actually related to <i>Kala</i>. <i>Kala</i> means (1) time, (2) kingdom of power. This what resembles <i>segara madu</i>. People who possess power in his life will attract others through their speech. In the other side, <i>sukra</i> (Friday) is teeth, <i>sukra ketu</i> has a more powerful power. The Goddess of Friday is <i>Sambhu</i>, the maker of the law of celestial power, including the law of frequency. <i>Sambhu</i> is the power of the three realms circulation (<i>bhur, bwah, swah</i>), and also to keep the power of those realms balance. There is the power of <i>Sang Kala Eka Dasa Bumi</i> in <i>bhur</i> world, <i>Sang Kala Adikala</i> in the <i>bwah</i> world, and <i>Sang Kala Sunia</i> in the <i>swah</i> world. <i>Sambhu</i> keeps those powers in balance.</p> <p>There is also sources and core of sincerity on Friday. The sincerity of power management and its nature, while in ourselves we can transfer sincerity to others. If a child was born on Friday, he must have sincerity. With sincerity that will bring good luck and success. Expectation that is beyond reach or to high is bad for the mental health of the people who was born on Friday.</p> <p>We should wear blue cloth on Friday to harmonize with nature.</p>
Saturday	Red Cloth.	<p>On Saturday, there are two dimensions, those are <i>Durga</i> and <i>Wasurama</i> which is related to <i>segara mumbul</i>. <i>Segara mumbul</i> is the evaporation from the earth. There are two types of vapors, one coming from the sea, and the other coming from the land. Ruler of the Earth is <i>Durga</i>. <i>Durga</i> also has the nature of fusion and destruction. Fusion is about to restore something back to its origin, but destruction is to eliminate all goodness. This is the key, so there are two dimensions.</p>

	<p>The fusion done by <i>Durga</i> is like melting gold jewelleries, the contents will remain and will not be lost, but it will change form. While destruction include destroying all of the good that exist on this earth.</p> <p>There is also <i>Dewa Wasurama</i> on Saturday. <i>Wa</i> means the function of <i>embang</i>. In the <i>embang</i> or nature, goodness is maintained, everyone is active in this nature. The function of the <i>embang</i> is to give us the opportunity to do our activity. So, there is always an empty and free room for us. But people often lost in the free space? Why? Because of the human mind set, if you can add your knowledge, you will get freedom, where there are no obstacles that interfere.</p> <p>The most important thing is how we can align ourselves with the universe. If we can become <i>Wasurama</i>, we can provide opportunities for everyone, and we should not be a barrier to other people's actions.</p> <p>We should wear red cloth on Saturday to harmonize with nature.</p>

I GUSTI PUTU KAREP THE MASTER OF WINDU SARA FOUNDATION

I Gusti Putu Karep was born in 28 February 1950 in Tampak Siring. He started his spiritual journey in 1960's assisted by his spiritual teacher, Ida Peranda Gede Tembuku from Griya Pengembangan, Pejeng, Gianyar. Since 1993 he started teaching spiritual by himself to locals around Tampaksiring. He started teaching yoga and retreat from 2008 to the tourists who came to Bali, and he ever went to France in 2011 and 2012 to spread his teaching. In 2013 he established Windu Sara Foundation which acknowledged by The Ministry of Law and Human Rights of the Republic of Indonesia.

He married with I Gusti Ayu Alit and has three children I Gusti Bagus Guna Widnyana (43 years old), I Gusti Ayu Ernawawati (39 years old), and I Gusti Ngurah Pri Astara (36 years old).

I Gusti Putu Karep now still lives in Kulu - Tampaksiring Village, Bali - Indonesia. I met I Gusti Putu Karep teaching from a distance, during a weekend of Balinese practices given by a I Gusti Putu Karep student. I've been practicing meditation for 20 years. During this internship, during this workshop where I was invited. There were three practices that directly touched my heart. These practices came from I Gusti Putu Karep and I went to Bali to meet him. Seeing him, I saw that this sage transmitted the wisdom of the heart in relation to the universe, in a pure, true and just way. His direct and simple teaching connects our dimension to that of the universe in the feeling in a way that allows to open to the vibration of its elements. After a long I Gusti Putu Karep personal training course, I was advised to teach, which I have been doing ever since. We were able to organize several internships in Bali with my students who were able to progress quickly on the path of their personal research.

I Gusti Putu Karep also gave me manual energy techniques for Alzheimer's disease. I have been developing them for 7 years with my mother who very quickly was able to stop all medication, became calm and connected with her soul.

I want to thank from the bottom of my heart that, I Gusti Putu Karep, since I know him, has allowed me to evolve in spirituality, in the knowledge of myself, in helping others.

His knowledge allows one to relate truthfully and kindly to the living in inner peace.
